EDUCATION

FEU INSTITUTE OF TECHNOLOGY

BS Computer Science

Major in Software Engineering

Relevant Coursework: Data Structures & Algorithms, Software Engineering, Operating Systems, Database Systems, Object Oriented Programming, Web & Mobile Development

Manila City
2027

PROJECTS

Personal Finance Tracker | Mobile and Web Application

2026

- Developed a full-stack personal finance application using React, React Native, TypeScript, Express, and Supabase, providing a unified platform for managing expenses, income, bills, budgets, and savings goals.
- Integrated Google Gemini Flash and Tesseract.js for AI-powered financial assistance and receipt OCR, enabling users to receive financial insights and streamline expense entry from receipts.
- Implemented secure authentication, protected APIs, and Supabase Row Level Security across a shared web and mobile backend, protecting user financial data while supporting consistent access across platforms.

TAKO – Teaching with Adaptive Knowledge Orchestration | Hackathon – 3rd Place (40 Teams)

2026

- Designed the mobile game's UI/UX in Figma by creating intuitive interfaces and user flows for its educational RPG experience, supporting accessible and engaging math learning for Grade 7–10 students.
- Collaborated with developers to translate UI/UX designs into an offline-first Android educational RPG featuring bilingual AI-assisted math questions and personalized feedback, delivering a functional prototype within the hackathon deadline.
- Presented and pitched the team's solution to the judging panel by demonstrating its educational impact and key features, helping secure 3rd place among 40 competing teams from different schools.

Automated Cryptographic Hashing System for Legal Document Integrity Verification | Thesis Project

2026

- Designed the system's UI/UX in Figma by creating intuitive layouts and user workflows, improving the usability and accessibility of document management and verification processes.
- Developed responsive frontend interfaces using React, Vite, and Bootstrap, delivering consistent user experience across the system's authentication, dashboard, document, and verification features.
- Integrated frontend components with REST API endpoints for document verification, user management, and audit records, enabling users to securely interact with the system's SHA-256 and ECDSA-based verification functionality.

EXPERIENCE

Saint Mary's Angels College of Valenzuela

IT Support Intern

Valenzuela City
Jan 2023 – May 2023

- Maintained and troubleshooted laboratory computers by diagnosing hardware and software issues reported by students, ensuring systems remain functional and available for classes.
- Installed and configured routers and network connections across designated school areas, improving internet accessibility and maintaining reliable connectivity.
- Created and repaired custom Ethernet cables using crimping tools and proper cable termination techniques, supporting network installations and resolving connectivity issues.

ACTIVITIES

ASSOCIATION FOR COMPUTING MACHINERY (ACM)

Member

Manila City
Aug 2023 – July 2026

- Participated as an active member of the ACM student chapter, engaging in organization activities and technology-focused events throughout three academic years.

ADDITIONAL

Technical Skills: JavaScript/TypeScript, Java, C++, Python, PHP, SQL, React, React Native, Kotlin, Node.js, Tailwind CSS, Bootstrap, PostgreSQL, MySQL, Supabase

Tools: Git, GitHub Actions, Postman, Expo, Figma, Vercel, Railway, Render

Certifications: PMI Project Management Ready; Cisco Introduction to Networks; IT Specialist – Python (Certiport); Android Development with Kotlin (LinkedIn Learning)
